Executive Summary

This Analytical Data Report (ADR) presents a data summary for the physical and analytical data collected during field investigations within Operable Unit (OU) 10 located at Hill Air Force Base (HAFB or Base), Utah. Data presented in this ADR were collected between May 1, 2001 and January 31, 2002 as part of the on-going Remedial Investigation/Feasibility Study (RI/FS) for OU 10.

Three areas encompass OU 10 1100 Area, 1200 Area, and the Defense Reutilization Marketing Office (DRMO)/Pond 7 Area (formerly identified incorrectly as Pond 6). Field activities that have been conducted at OU 10 during the RI/FS process include: Cone Penetration Testing (CPT) and direct-push groundwater sampling, geophysical groundwater mapping, monitoring well installation and sampling, and soil sampling. The field and analytical results associated with the CPT program and monitoring well sampling are documented in this ADR. Field investigation activities performed and data collected subsequent to this report will be documented in the RI/FS report.
